[57] ABSTRACT

PROBLEM TO BE SOLVED: To provide an inexpensive air cleaner which can efficiently crack odorous components without upsizing the air cleaner and is small in size and good in installability.

SOLUTION: This air cleaner has a photocatalyst medium deposited with at least photocatalysts, a light source for irradiating the photocatalyst medium with UV rays and fans for sending air to the photocatalyst medium. A plurality of the fans described above are arranged to line up in parallel.
